

Steel Rough Terrain Roll Transport Forks 46 in. x 21 in. Black

MODEL RT-EPT-RR-FK

Fork Truck Attachments / Drum Roll Reel Forks

PRODUCT OVERVIEW

The reel/roll transport forks are an excellent extension to the electric pallet truck accessory group. Each fork is independent of the other, making it simple to expand or shrink the space between the forks depending on the size of the product. Forks are secured to the carriage of the pallet truck, making it accessible for those possible adjustments. The design angle of the forks keeps the products centered and stable during transport. Forks are constructed of steel with a powder coat finish.

KEY FEATURES

- Concave design shape
- Rounded edges and corners
- Minimizes workplace bending and lifting
- Enables secure loading and unloading of products
