MODEL TM-20-AIR

Ergonomic Solutions / Tilt Master & Tilt Master Straddle

PRODUCT OVERVIEW

The tilt master lifts and positions filled tote boxes or baskets without the need of a fork truck or lift table using the newly designed heavy-duty tilt master. The tilter will function as transporters by moving completed products from work station to work station without waiting for a fork truck. The lift has a thin profile to allow the user to get as close to the load as possible, a standard floor lock and rolls easily on the phenolic steering wheels. It is designed to be used with open bottom pallets or skids. The unit is powered by an air pneumatic motor.
